

Material Data Sheet Revised 8/01/18

Product:	Polypropylene House Wrap
Base Material:	Crosswoven Polypropylene
Color:	Black, white, more upon request
Product Dimensions:	Widths: 3', 8', 9', or 10' / Lengths: 100', 150', or 200'.
Weight:	1.92/oz/yd ²

Description

Crosswoven, micro-perforated polypropylene house wrap. Designed to protect exterior wall systems from bulk moisture infiltration.

Can be converted into a drainable house wrap. It is UV protected and can be exposed to the elements for 6 months without deterioration in quality. The micro-perforation allows moisture and vapor to escape while also acting as an air barrier. Requires no maintenance after installation.

Testing Parameters

This information is based on ASTM standard tests. This data should not be considered specification.

Test Description	Value	Test Method
Tensile Strength (MD / CD)	52 lb / 29 lb	D 882
Water Resistance	Pass	D 779
Water Vapor Transmission	9-10 Perms	E 96
Pliability	Pass	AC 38 3.3.4

The information presented in this data sheet is believed to be accurate and is not intended to constitute a specification. The values given reflect average measurements, which can vary slightly. Users are encouraged to determine the suitability of this product for their own particular application(s).

Base on terms and conditions
 Seller's only obligation shall be to replace such quantity of the product proven to be defective. Seller shall not be liable for any injury, loss or damage, direct or consequential, arising out of the use, or inability to use the product for his/her use, and the user assumes all risk and liability whatsoever in connection therewith. The foregoing may not be changed, except by an agreement signed by an officer or seller. We hereby certify that goods covered by this quotation have been produced in compliance with the Fair Labor Standards Act of 1983, as amended. Any credit memos to purchaser shall expire if not used within one year from date of credit memo.
