

Coating, Laminating & Metallizing

Adding Protection, Durability and Integrity to Your Products

Griff's Applied Laminates Division is a global leader in coating, laminating, metallizing and other product services. Our modern climate controlled facilities ensure your products remain at the highest quality throughout our process. Furthermore, in serving industries such as the aerospace, electronic, energy, food, medical, packaging and more we can develop innovative and unique films, foils, foams, papers and non-wovens for your company's specific needs. In addition, Griff offers state-of-the-art Corona Treating machines for all plastics and liners. Contact a Griff representative today to learn more about how our services can help your company succeed.

Research & Development

Griff's Product Development Department combines superior technology with some of the most diverse and knowledgeable industry experts. We utilize over forty years of manufacturing experience along with our vast supply of resources and personnel to help build your vision. All of our testing is conducted in a modern ISO9001:2015 facility and we can provide services that include:

- Prototyping & Trials
- Re-engineering
- Materials Research
- Technology Development

Coating Services

Our coating services can help your business create innovative products from printable top-coatings and pressure sensitive adhesives to release and barrier coatings.

- 100% Solid UV Cure
- Multiple Coating Configurations with Anilox
- On-Site Mixing
- In-line Corona Treating
- Climate Controlled Production Room
- Large range of coating thicknesses – 0.1 mil to 2mil

Typical Coatings Include:

- Antimicrobial
- Anti-static
- Blackout (Light Filtering)
- Chemical & Corrosive Resistant
- Decorative / Custom Colors
- Dry Erase
- Embossable
- Hard-Coats
- Matte
- Print Receptive
- Release
- Scratch Resistant
- Slip
- UV Blocking

Laminating Services

Griff offers lamination services to help add integrity and durability to a variety of films, foils, foams, papers and non-wovens.

- 100% Solid PUR adhesive system
- Multiple Ply Constructions
- Adhesive & Thermal Bonding
- In-line Corona Treating
- Climate Controlled Production Room

Metallizing Services

Griff offers Metallizing on a variety of plastic films to enhance your products shelf appeal. Metallizing also offers moisture barrier and static dissipation properties to further protect your product by using engineered packaging.

- Vacuum Metallizing
- Vapor Deposited Aluminum
- 0.5 – 4.0 Optical Density
- 25g – 500g Films
- PET, PA, PI, PP, PE, PVC
- 50gsm – 300gsm Woven & Non-wovens

Corona Treating Capabilities

- Cleaning and treating plastics for bonding and printability
- Up to 100" Treatment Width Max
- Thin Film and Foams up to 60mil
- Converting Services - All of our processes can be further tailored to your needs. We specialize in slitting, sheeting, rewinding, die-cutting, spooling and packaging!
