

THE GRIFF NETWORK

"Delivering Quality Through Innovation, Process and Service"

Bio-Compostable Coated Papers and Boards

Since our inception, Griff has been committed to the environment by initiating recycling programs and creating greener solutions.

Our bio-compostable coated papers and boards are an innovative, environmentally friendly solution to your product challenges. The Griff Network's bio-compostable materials are manufactured using bio-based resources, leaving greener footprints. This sustainable product has a wide range of applications and is compostable, biodegradable, and recyclable. Our bio-compostable products are designed to biodegrade completely. According to our product testing, this product can biodegrade up to 75% in five months. Our bio-compostable products are perfect for reducing the environmental impacts of packaging.

Features:

- Certified compostable according to EN13432 (DIN CERTCO) and Biodegradable ASTM D6400
- Complies with BFR XIV and XXXVI
- Food safe and ideal for direct food contact
- Heat sealable
- Provides an excellent barrier
- Durable and Tear Resistant
- Designed to biodegrade completely into carbon dioxide, water, and biomass when placed in an average commercial composting environment
- Print receptive surface is perfect for company names and logos
- Reduces environmental impact of packaging

Product Applications:

- Packaging
- Food Industry
- Disposable cups, plates, bowls, and more
- Mailers
- Boxes

Structure:

- Bio-polymer coated paper
- Bio-polymer coated stock
- Bio-polymer coated paper laminates

Specifications:

- Custom sizes and widths available
- Available in sheets, rolls, and die-cuts
- One and two-sided cup stock and liner board with custom thicknesses available upon request
